

Technology that's as sure as a sunrise.

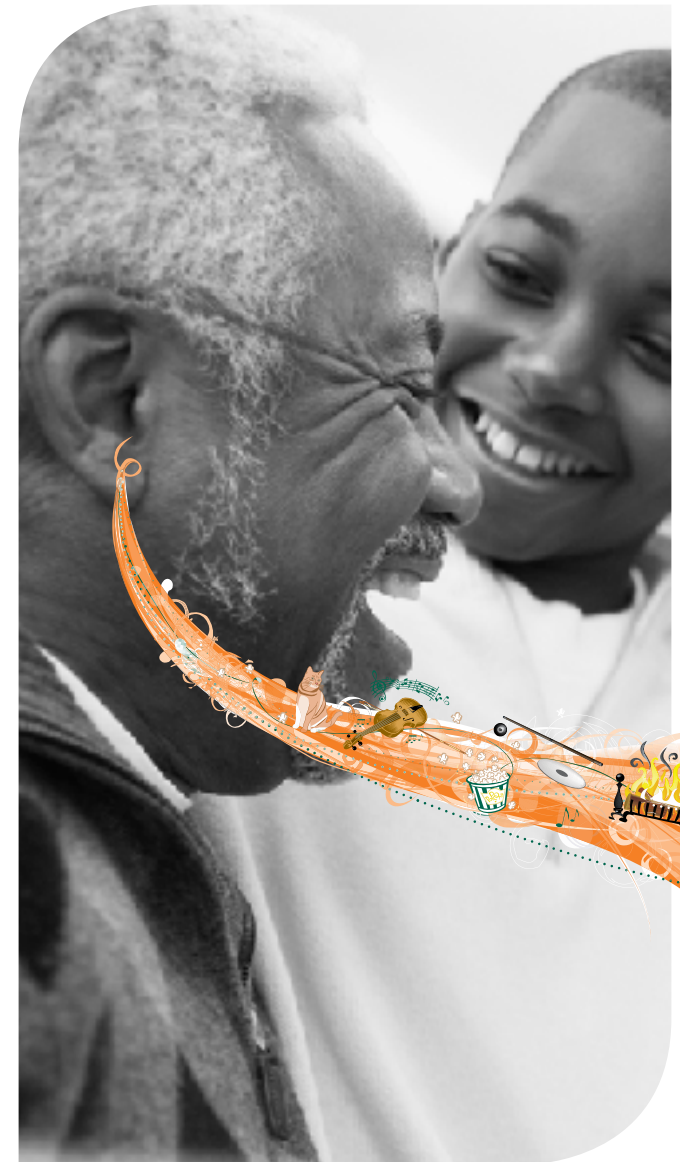

Introducing the new Day⁺. Looking for high-quality, low-maintenance, reliable hearing aids that contain proven technology and are economical too? It's all in a day's work for Day⁺.

Features vary by product level. Talk to your hearing health professional for a complete feature list and to determine which product is right for you.

For over 50 years, Rexton has listened to the unique needs of Hearing Health Professionals and people with hearing loss around the world and reacted quickly to their needs. Rexton develops a full line of solutions for all types of hearing loss and lifestyle needs with value, innovation, quality, and usability in mind. We strive to put our customers first at every opportunity and make better hearing more accessible.

REXTON

Unmistakably Clearer Speech

Speech

Day+ wearers are natural-born communicators. Because you'll hear speech more clearly than before, nothing will get in the way of a good chat.

Noise Reduction

Improves comfort and audibility of speech by analyzing incoming signals and separating out continuous non-speech noise. This technology softens distracting noise and enhances important speech signals all without you having to make adjustments.

Automatic Adaptive Directional Microphone

Gives you better speech clarity in complex, noisy listening environments.

Set & Go

Keep things simple. You count on hearing aids that provide the most hassle-free use, and what's more simple and hassle-free than automatic?

Automatic Environment Manager

Like the central nervous system of Day+, Automatic Environment Manager works automatically to assess the listening situation and classify it quickly. This technology will engage or disengage needed features to help you overcome the challenges you would likely face in any given environment.

Day-By-Day Ease

Comfort

Natural sound and easy listening help you enjoy your hearing aids so you feel comfortable strolling downtown, at the shopping mall, on the boardwalk, wherever the road of life leads you.

Feedback Preventer

Uses proven technologies that stop feedback in its tracks, before you or anyone nearby can hear it. Feedback Preventer frees you from embarrassing and annoying feedback.

Programs

To help you enjoy hearing in different environments, Day+ offers multiple listening programs, which your Hearing Health Professional can configure to meet your individual requirements.

reddot design award winner 2010

Comfy Sound From Day One.

Rexton Quality+

Your Day+ hearing aids are covered.

Nanocoating

Our ultra-thin nanocoating protects instruments from sweat, moisture and humidity more thoroughly than other liquid repellency solutions. The nanocoating improves battery life and enhances hearing instrument reliability.

Convenience

With rechargeability, synchronized sound, and simple remote operation, Day+ is as easy on the environment as it is to handle and care for.

Green & Easy

An eco-friendly, convenient, and easy-to use charging solution. Green & Easy technology allows Day+ to be charged overnight using a handy charging unit for a full day of trouble-free operation. Humidity and moisture can spell trouble for sophisticated hearing aid components. That's why the Rexton charger includes a drying function that will leave instruments dry and refreshed each morning.

Remote Control

The optional remote control, with easy-to-see buttons, puts wireless control at your fingertips by enabling you to easily and discreetly change the settings of your hearing instruments.

Wireless Assistant

Optimizes your hearing aids' sound quality and ease of use. Automatically synchronized digital signal processing eliminates potential differences in critical features from hearing aid to hearing aid. It also allows you to use a convenient remote control.

Simply Attractive

Five colors are available: Beige, Brown, Granite, Gray, and Silver
